SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates — January 1974

Seasonally-adjusted, the first estimate(1) of the industrial composite(2) employment index for Canada (1961=100) rose 1.0 percent in January 1974. Gains were recorded in all industry divisions except forestry and construction. All regions contributed to the overall advance in the level of employment except the Atlantic Region, which showed no change from the previous month.

Average weekly earnings, unadjusted for seasonal variations, jumped 3.4 percent in January to \$168.47 at the Canada composite level. Gains were recorded in all industry divisions reflecting, in part, the resumption of normal activity following the Christmas holiday period. All five regions recorded substantial increases in average weekly earnings.

Employment — Seasonally-Adjusted

December 1973

Preliminary data for December 1973 indicated a rise of 0.9 percent in the *Canada* industrial composite index of employment. The most substantial gains, over-the-month, were recorded in manufacturing and construction. In the former, a 1.0 percent increase in employment mainly reflected increases in motor vehicles following the resolution of industrial disputes. In the latter, the 3.6 percent rise reflected in part a changing employment pattern during the Christmas period. This involved a growing tendency, particularly evident in Quebec, to provide a paid holiday period in the last pay period of December to employees who formerly took holidays without pay during this period.

The 1.4 percent advance in service employment was mainly in the recreational and business components. In finance, insurance and real estate, the 0.3 percent increase mainly reflected gains in financial institutions. Increases in water transport and services accounted for the largest portion of the 0.3 percent rise in transportation, communication and other utilities. Forestry employment rose 1.5 percent reflecting gains in logging, while the 0.4 percent rise in mining employment reflected widespread gains in metals and mineral fuels. Employment in trade dropped 0.2 percent in December owing to declines in the retail component.

In the *Atlantic Region*, the composite index rose 0.7 percent in December. Newfoundland and Nova Scotia showed gains of 2.5 percent and 1.1 percent, respectively, while declines occurred in Prince Edward Island (1.1 percent) and New Brunswick (0.6 percent). The largest increases were in food and beverages, wood products and engineering; a somewhat offsetting decline was recorded in logging.

The *Quebec* composite index recorded a 1.6 percent advance from November to December. The most substantial portion of this increase reflected gains in construction which were in part the result of changing seasonal patterns. In addition, there were rises in employment in logging, durables, water transport and services, hotels, restaurants, and taverns, and miscellaneous services.

Premières estimations — Janvier 1974

Selon les premières estimations(1), l'indice synthétique industriel(2) désaisonnalisé de l'emploi (1961=100) au Canada a augmenté de 1.0% en janvier 1974. On a enregistré des hausses dans toutes les divisions d'activité économique à l'exception de l'exploitation forestière et de la construction. Toutes les régions ont contribué à cette augmentation globale du niveau de l'emploi sauf la région de l'Atlantique, où il est demeuré stationnaire par rapport au mois précédent.

Les gains hebdomadaires moyens non désaisonnalisés ont progressé de 3.4% en janvier pour se fixer à \$168.47 au niveau de l'indice du Canada. On a observé des augmentations dans toutes les divisions d'activité économique, traduisant en partie la reprise de l'activité normale après la période des Fêtes. Les cinq régions ont enregistré des hausses appréciables au chapitre des gains hebdomadaires moyens.

Emploi — Chiffres désaisonnalisés

Décembre 1973

Les données préliminaires indiquent qu'en décembre 1973 l'indice synthétique industriel de l'emploi au *Canada* a augmenté de 0.9%. Les augmentations les plus importantes au cours du mois ont été enregistrées dans les industries manufacturières et dans la construction. Dans le premier cas, la hausse reflète surtout des augmentations dans l'industrie des véhicules automobiles à la suite du règlement de conflits du travail. Dans le deuxième cas, l'augmentation de 3.6% s'explique en partie par l'évolution du régime d'emploi pendant la période des Fêtes. En effet, on a tendance de plus en plus, en particulier au Québec, à accorder des jours fériés payés pendant la dernière période de paie de décembre aux employés qui avaient pris auparavant des jours fériés non payés au cours de la même période.

L'augmentation de 1.4% de l'emploi dans les services s'est surtout produite dans les secteurs de loisirs et du commerce. Dans les finances, assurances et affaires immobilières, la hausse de 0.3% a représenté en grande partie les augmentations observées dans le secteur des institutions financières. Pour ce qui est des augmentations dans les transports par eau et les services auxiliaires, elles ont représenté la plus grande partie des hausses enregistrées dans les transports, communications et autres services publics. L'emploi dans l'industrie forestière a progressé de 1.5%, rendant compte des augmentations dans l'exploitation forestière tandis que dans les mines, la hausse de 0.4% est imputable aux nombreuses majorations dans le secteur des mines de métaux et des combustibles minéraux. L'emploi dans le commerce a régressé de 0.2% en décembre en raison de baisses dans le secteur du détail.

Dans la *région de l'Atlantique*, l'indice synthétique a progressé de 0.7% en décembre. Il a augmenté de 2.5% à Terre-Neuve et de 1.1% en Nouvelle-Écosse, alors qu'il baissait à l'Île-du-Prince-Édouard (1.1%) et au Nouveau-Brunswick (0.6%). Les augmentations les plus importantes ont été enregistrées dans les aliments et boissons, les produits du bois et les travaux de génie, mais elles ont été quelque peu compensées par une baisse dans le secteur de l'exploitation forestière.

Au *Québec*, l'indice synthétique a avancé de 1.6% de novembre à décembre. La majeure partie de cette hausse s'explique par des augmentations dans la construction imputables à l'évolution des tendances saisonnières. En outre, on a observé une montée de l'emploi dans l'exploitation forestière, les industries de biens durables, les transports par eau et les services auxiliaires, les hôtels, les restaurants et les tavernes et les services divers.

In *Ontario*, the industrial composite employment index rose 0.4 percent in December. The most substantial increase was in durables manufacturing; it reflected increased employment in motor vehicles following the resolution of industrial disputes. Gains were also recorded in recreational and business services. These gains were somewhat offset by declines in building, engineering and retail trade.

The industrial composite index of employment for the *Prairie Region* rose 0.9 percent in December as increases were recorded in all three provinces. The increases were concentrated in durables, building, engineering, and business services.

In *British Columbia*, a 0.4 percent rise in employment was recorded from November to December. Gains in logging, building, engineering, and retail trade were offset to some extent by declines in water transport and services, air transport and services, and insurance and real estate.

Earnings and Hours

December 1973

Seasonally-adjusted, average weekly earnings at the Canada industrial composite level rose 2.5 percent in December. Gains were recorded in all industry divisions and in all provinces except Prince Edward Island.

Unadjusted for seasonal variations, average weekly earnings fell 1.2 percent in December to \$163.00 at the Canada composite level. Decreases were recorded in all provinces with the exception of New Brunswick, Manitoba and Saskatchewan, which recorded gains.

Average weekly earnings in *forestry* fell 3.5 percent in December to \$194.00 mainly reflecting fewer hours worked in Quebec and Ontario.

In *mining*, average weekly earnings declined 0.5 percent from November to December owing to reduced earnings in metals and services incidental to mining. Average weekly hours of hourly-rated wage-earners dropped from 41.5 in November to 40.5 in December reflecting, for the most part, decreases in metals and services incidental to mining. Average hourly earnings rose 4 cents to \$5.05 reflecting increases in all components.

Average weekly earnings in *manufacturing* at \$170.30 were 1.8 percent lower than during the previous month. Decreases were recorded in all provinces except Newfoundland, New Brunswick and British Columbia. Average weekly hours dropped from 40.0 in November to 37.9 in December as declines in both durables and non-durables. Average hourly earnings showed a 8-cent rise to \$4.05 mainly as the result of widespread increases in the non durables component.

In *construction*, average weekly earnings fell 11.0 percent to \$207.55. This decline was substantially smaller than usual for this time of year and it reflected, in part, a changing seasonal pattern resultant from the growing tendency, particularly in Quebec, to provide paid holidays at Christmas to employees who formerly took holidays without pay. Average weekly hours dropped from 39.3 in November

En *Ontario*, l'indice synthétique de l'emploi a progressé de 0.4% en décembre. L'augmentation la plus importante a été observée dans les industries de biens durables; elle traduit un accroissement de l'emploi dans l'industrie des véhicules automobiles à la suite du règlement de conflits du travail. On a également enregistré des hausses dans les services récréatifs et commerciaux. Ces augmentations ont été quelque peu compensées par des baisses dans la construction, les travaux de génie et le commerce de détail.

L'indice synthétique industriel de l'emploi dans la *région des Prairies* a progressé de 0.9% en décembre par suite des hausses enregistrées dans les trois provinces au niveau des industries de biens durables, de la construction, des travaux de génie et des services commerciaux.

En *Colombie-Britannique*, on a observé une progression de 0.4% du novembre à décembre. Les augmentations observées dans l'exploitation forestière, la construction, les travaux de génie et le commerce de détail ont été jusqu'à une certaine mesure compensées par des diminutions dans les transports par eau et les services auxiliaires, les transports aériens et les services auxiliaires, les assurances et les affaires immobilières.

Gains et heures

Décembre 1973

Après désaisonnalisation, les gains hebdomadaires moyens pour l'ensemble des industries au Canada ont augmenté de 2.5% en décembre. On a observé des hausses dans toutes les divisions d'activité économique et dans toutes les provinces sauf à l'Île-du-Prince-Édouard.

Non corrigées des variations saisonnières, les gains hebdomadaires moyens ont diminué de 1.2% en décembre pour se fixer à \$163.00 pour l'ensemble du Canada. Toutes les provinces ont enregistré des baisses à l'exception du Nouveau-Brunswick, du Manitoba et de la Saskatchewan qui ont enregistré des hausses.

Les gains hebdomadaires moyens dans l'industrie *forestière* ont régressé de 3.5% en décembre pour s'établir à \$194.00, en raison principalement d'une diminution du nombre d'heures travaillées au Québec et en Ontario.

Dans les *mines*, les gains hebdomadaires moyens ont diminué de 0.5% entre novembre et décembre par suite d'une baisse des gains dans les mines de métaux et les services miniers. Le nombre hebdomadaire moyen d'heures travaillées des ouvriers rémunérés à taux horaire est passé de 41.5 en novembre à 40.5 en décembre, traduisant en grande partie des diminutions dans les mines de métaux et les divers services miniers. Les gains horaires moyens ont augmenté de 4 cents pour s'établir à \$5.05 à la suite des augmentations observées dans tous les secteurs.

Les gains hebdomadaires moyens dans les *industries manufacturières* (\$170.30) ont baissé de 1.8% par rapport au mois précédent. On a observé des baisses dans toutes les provinces sauf à Terre-Neuve, au Nouveau-Brunswick et en Colombie-Britannique. Le nombre hebdomadaire moyen d'heures travaillées est passé de 40.0 en novembre à 37.9 en décembre, des baisses ayant été enregistrées dans les industries de biens durables et non durables. Les gains horaires moyens se sont fixés à \$4.05 (+ 8 cents) en raison principalement des nombreuses augmentations accordées dans l'industrie des biens non durables.

Dans la *construction*, les gains hebdomadaires moyens ont reculé de 11.0% pour s'établir à \$207.55. Cette baisse est beaucoup moins importante que celle que l'on observe à cette époque de l'année et elle traduit, en partie, l'évolution de la saisonnalité imputable à l'octroi de plus en plus répandu, en particulier au Québec, de jours fériés payés à Noël aux employés qui prenaient auparavant des jours fériés non payés. Le nombre

to 33.8 in December, while average hourly earnings remained virtually unchanged.

In *transportation, communication and other utilities* a 1.4 percent rise in average weekly earnings in December mainly reflected widespread gains in the transportation component. Average weekly earnings in *trade* rose 1.9 percent reflecting gains in retail, while in *finance, insurance and real estate* a 0.6 percent increase in earnings was the result of gains in insurance and real estate. Increased earnings in recreational and business services occasioned most of the 1.9 percent rise in average weekly earnings in *service* in December.

hebdomadaire moyen d'heures travaillées est passé de 39.3 en novembre à 33.8 en décembre, alors que les gains horaires moyens demeuraient pratiquement inchangés.

La hausse de 1.4% des gains hebdomadaires moyens observée dans *les transports, les communications et les autres services publics* en décembre représente surtout les nombreux gains du secteur des transports. Les gains hebdomadaires moyens dans le commerce ont progressé de 1.9% en raison de hausses dans le commerce de détail et ceux du secteur des *finances, assurances et affaires immobilières* de 0.6% par suite des augmentations observées dans les assurances et les affaires immobilières. L'accroissement des gains dans les services récréatifs et commerciaux représente presque toute la hausse de 1.9% des gains hebdomadaires moyens observée dans le secteur des *services* en décembre.

- (1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.
- (2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

- (1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.
- (2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés durant n'importe quel mois de l'année.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

p Preliminary figures. - Nombres provisoires.

f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*

1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue No. 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue No. 72-002, February 1972.*

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002* for 1971, 1972 and 1973.

- (1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées) 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du n^o 72-002 au catalogue pour les années 1971, 1972 et 1973.

- (1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274), de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes de rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés par l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qu

liminary(p); the latter are based on monthly averages.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised figures and annual averages; these data are contained in catalogue nos 72-201 and 72-202.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, l'après le concept de l'établissement:

2-002 – **Emploi, gains et durée du travail**, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

2-005 – **Estimations du revenu du travail**, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

2-008 – **Estimations du nombre d'employés par province et par industrie**, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

2-201 – **Review of Employment and Average Weekly Wages and Salaries**, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

2-202 – **Review of Man-Hours and Hourly Earnings**, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

2-204 – **Earnings and Hours of Work in Manufacturing, 1969**, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

2-206 – **Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971**, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

2-502 – **Labour Income, 1926-1958** – épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

2-506 – **Côuts de la main-d'oeuvre dans l'industrie manufacturière, 1967**, Annuel

2-508 – **Estimations du nombre d'employés par province et industrie, 1961-1968**, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

2-510 – **Côuts de la main-d'oeuvre dans l'industrie manufacturière, 1968**, Annuel

2-511 – **Côuts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969**

2-513 – **Estimations du nombre d'employés par province et par industrie, 1961-1972**, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

2-601 – **Gains et heures de travail au Canada: Commerce de détail, Septembre 1970**

2-610 – **Côuts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970**

2-611 – **Côuts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970**

2-612 – **Côuts de la main-d'oeuvre au Canada: industrie manufacturière, 1971**

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- — amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates — February 1974

Seasonally-adjusted, the first estimate(1) of the Canada industrial composite(2) employment index (1961 = 100) showed a 0.4 per cent rise from January to February 1974. Gains were recorded in all industry divisions except manufacturing, construction and trade. All provinces shared in the growth in employment except Ontario, which showed no change, and British Columbia, which declined.

Average weekly earnings, unadjusted for seasonal variations, rose 1.5 per cent in February at the Canada composite level. This increase reflected gains in all industry divisions. Among the provinces, only Newfoundland failed to record an increase in earnings from January.

Employment — Seasonally-Adjusted

January 1974

Preliminary data for January 1974 indicated a rise of 0.6 per cent in the Canada industrial composite index of employment. The most substantial increases over-the-month were in trade and transportation, communication and other utilities. Employment in trade rose 0.9 per cent in January reflecting extensive gains in both wholesale and retail, especially in department stores. The 1.8 per cent advance in transportation, communication and other utilities reflected widespread gains in water transport and services, highway and bridge maintenance, communication and utilities.

In manufacturing, employment rose 0.5 per cent in January with gains in both durables and non-durables. Forestry employment rose 2.6 per cent mainly reflecting increases in the logging sector. Employment in finance, insurance and real estate rose 0.3 per cent as gains in financial institutions more than offset declines in insurance and real estate. Construction employment dropped 0.8 per cent reflecting decreases in both building and engineering, while mining employment fell 1.2 per cent reflecting decreases in metals and industrial disputes in mineral fuels. Service showed virtually no change over the month as decreases in recreational services were offset by gains in the remaining components.

In the *Atlantic Region*, the composite index rose 1.6 per cent in January. Increased employment was recorded in all four provinces. The most substantial increases were in logging, highway and bridge maintenance and department stores. Smaller gains were noted in wholesale trade, durables and non-durables manufacturing. Somewhat offsetting declines were recorded in general contractors, highways, bridges and streets, and water transport and services.

The *Quebec* composite index recorded a 0.7 per cent advance from December to January. Employment increases were widespread; the largest were in durable goods, non-durable goods, communication, transportation and variety stores. Reductions in employment occurred in both building and engineering construction. These reductions followed unusually large increases in the previous month and reflected, in part, a changing seasonal pattern associated with the Christmas holiday season.

Premières estimations — Février 1974

La première estimation(1), désaisonnalisée, de l'indice synthétique industriel(2) de l'emploi dans les activités économiques (1961 = 100) fait ressortir une augmentation de 0.4% entre janvier et février 1974. Toutes les divisions d'activité économique ont connu des gains, sauf les industries manufacturières, la construction et le commerce. Toutes les provinces ont participé à l'accroissement de l'emploi, sauf l'Ontario, où il n'y a pas eu de changement, et la Colombie-Britannique, où l'emploi a diminué.

Les gains hebdomadaires moyens, non corrigés des variations saisonnières, ont augmenté de 1.5% en février au niveau de l'ensemble du Canada. Cette augmentation traduisait des accroissements dans toutes les divisions d'activité économique. Parmi les provinces, seule Terre-Neuve n'a pas connu d'augmentation des gains par rapport à janvier.

Emploi — Chiffres désaisonnalisés

Janvier 1974

Les données provisoires de janvier 1974 indiquent un accroissement de 0.6% de l'indice synthétique industriel de l'emploi dans les activités économiques pour l'ensemble du Canada. Les augmentations les plus remarquables au cours du mois sont survenues dans le commerce et les transports, les communications et les autres services publics. L'emploi dans le commerce s'est élevé de 1.9% en janvier suite à des progressions sensibles tant dans le commerce de gros que dans le commerce de détail, surtout du côté des grands magasins. La progression de 1.8% dans les transports, les communications et les autres services publics était le résultat de hausses généralisées dans les transports par eau et les services auxiliaires des transports par eau, l'entretien de routes et de ponts, les communications et les services publics.

Dans les industries manufacturières, l'emploi a augmenté de 0.5% en janvier grâce à des gains survenus tant du côté des biens durables que du côté des biens non durables. L'emploi dans les forêts a augmenté de 2.6%, traduisant surtout des augmentations dans le secteur de l'abattage. L'emploi dans les finances, les assurances et les affaires immobilières a progressé de 0.3%, les gains survenus dans les institutions financières ayant largement compensé les diminutions dans les assurances et les affaires immobilières. L'emploi dans la construction est tombé de 0.8%, suite à des chutes dans le bâtiment et le génie civil, tandis que l'emploi dans les mines est tombé de 1.2% traduisant des baisses dans les mines métalliques et des conflits du travail dans les combustibles minéraux. Du côté des services, il n'y a eu pour ainsi dire aucun changement au cours du mois car les diminutions dans les divertissements et loisirs ont été compensées par des augmentations dans les autres composantes.

Dans la région de l'Atlantique, l'indice synthétique industriel a augmenté de 1.6% en janvier. Chacune des quatre provinces a connu une augmentation de l'emploi. Les augmentations les plus considérables sont survenues dans l'abattage, l'entretien de routes et de ponts, et les grands magasins. Des augmentations plus faibles ont été constatées dans le commerce de gros et dans la fabrication des biens durables et non durables. Ces progressions ont été quelque peu compensées par des diminutions chez les entrepreneurs généraux, la construction de ponts et de voies publiques et dans les transports par eau et les services auxiliaires des transports par eau.

L'indice synthétique industriel du Québec a monté de 0.7% entre décembre et janvier. Les augmentations d'emploi ont été généralisées; les plus importantes ont touché les biens durables, les biens non durables, les communications, les transports et les magasins d'articles divers. Des réductions d'emploi sont survenues dans le bâtiment et le génie civil. Ces réductions suivaient les augmentations inusitées du mois précédent et traduisaient en partie l'évolution d'un régime saisonnier lié à la période des Fêtes.

In *Ontario*, the industrial composite employment index rose 0.8 per cent in January. Considerable increases were recorded in a number of industries including durables, non-durables, building, engineering, transportation, communication, department stores and variety stores. Decreased employment occurred in metals mining and recreational services.

The industrial composite employment index in the *Prairie Region* rose 1.3 per cent in January as increases were recorded in all three provinces. All industry divisions except forestry and mining, which declined, contributed to the overall advance. The largest increases were in department stores, transportation, and utilities. Gains were also recorded in durables, non-durables, building, engineering, and business services.

In *British Columbia*, the composite index rose 1.3 per cent from December to January. Increased employment in durables manufacturing, transportation, communication, wholesale food and department stores accounted for the largest portion of the overall advance. The 6.0 per cent decline in mining employment reflected the impact of industrial disputes.

Earnings and Hours

January 1974

Seasonally - adjusted, average weekly earnings at the Canada industrial composite level showed almost no change from December 1973 to January 1974. Gains in forestry, manufacturing, finance, insurance and real estate, and service were virtually offset by decreases in the remaining industry divisions. Ontario recorded an increase in average earnings over-the-month, Quebec showed almost no change, while the remaining regions recorded declines.

Unadjusted for seasonal variations, average weekly earnings rose 3.0 per cent in January to \$166.74 at the Canada composite level. In part, this gain reflected the resumption of normal activity following the Christmas holiday period. All provinces except Saskatchewan recorded substantial gains in average earnings.

Average weekly earnings in *forestry* rose 7.2 per cent in January to \$200.03 mainly reflecting increased hours worked in British Columbia, Quebec and Ontario.

In *mining*, average weekly earnings rose 2.9 per cent in January to \$225.80. For the most part, this increase reflected increased hours worked in metals and services incidental to mining. Average weekly hours of hourly-rated wage-earners rose from 40.5 in December to 41.4 in January, while average hourly earnings rose 7 cents to \$5.10.

Average weekly earnings in *manufacturing* increased from \$169.72 in December to \$175.63 in January. This increase reflected widespread advances in hours worked and hourly earnings in both durables and non-durables. Over-the-month, average weekly hours rose 3.7 per cent to 39.4 and average hourly earnings increased by 0.7 per cent to \$4.07.

In *construction*, average weekly earnings climbed 13.5 per cent to \$232.75. This increase was substantially smaller than usual for this time of year, as had been the decrease in earnings the previous month. These smaller-than-usual changes reflected, in part, the changing seasonal pattern of the Christmas holiday period. Average weekly hours rose from 33.8 in December to 37.9 in January; average hourly earnings advanced from \$5.86 in December to \$6.13 in January.

En *Ontario*, l'indice synthétique de l'emploi dans les activités économiques a progressé de 0.8% en janvier. Il y a eu des accroissements considérables dans un certain nombre d'activités économiques, y compris les biens durables, les biens non durables, le bâtiment, le génie civil, les transports, les communications, les grands magasins et les magasins d'articles divers. L'emploi a diminué dans les mines métalliques et les divertissements et loisirs.

L'indice synthétique de l'emploi dans les activités économiques dans la *région des Prairies* a augmenté de 1.3% en janvier, les trois provinces ayant connu des augmentations. Toutes les divisions d'activité économique sauf les forêts et les mines, qui ont connu des baisses, ont contribué à la progression générale. Les augmentations les plus considérables ont eu lieu dans les grands magasins, les transports, et les services publics. On a aussi constaté des gains du côté des biens durables, des biens non durables, le bâtiment, du génie civil et des services fournis aux entreprises.

En *Colombie-Britannique*, l'indice synthétique industriel a monté de 1.3% entre décembre et janvier. L'augmentation de l'emploi dans la fabrication des biens durables, les transports, les communications, le commerce de gros et les grands magasins a représenté la plus forte proportion de la progression générale. La chute de 6.0% dans les mines traduisait les répercussions de conflits du travail.

Gains et heures de travail

Janvier 1974

Les gains hebdomadaires moyens *désaisonnalisés* au niveau de l'ensemble des activités économiques pour le Canada n'ont pour ainsi dire pas varié entre décembre 1973 et janvier 1974. Les hausses survenues dans les forêts, les industries manufacturières, les finances, les assurances et les affaires immobilières, et les services ont été à peu près compensées par de diminutions dans les autres divisions d'activité économique. L'Ontario enregistré une augmentation des gains moyens au cours du mois et Québec n'a connu presque aucun changement, tandis que les autres régions ont subi des baisses.

Les gains hebdomadaires moyens *non désaisonnalisés* ont monté de 3.0% en janvier pour atteindre \$166.74 au niveau de l'ensemble du Canada. Cet accroissement traduisait en partie la reprise de l'activité normale après la période des Fêtes. Toutes les provinces, sauf la Saskatchewan, ont connu des augmentations considérables des gains moyens.

Les gains hebdomadaires moyens dans les *forêts* ont augmenté de 7.2% en janvier pour atteindre \$200.03, par suite surtout de l'augmentation du nombre d'heures travaillées en Colombie-Britannique, au Québec et en Ontario.

Dans les *mines*, les gains hebdomadaires moyens ont monté de 2.9% en janvier pour atteindre \$225.80. Pour la plupart, cette augmentation traduisait un accroissement du nombre d'heures travaillées dans les mines métalliques et dans les services miniers. Le nombre moyen d'heures hebdomadaires des ouvriers payés à l'heure a monté de 40.5 en décembre à 41.4 en janvier, tandis que les gains horaires moyens ont monté de 7 cent pour atteindre \$5.10.

Les gains hebdomadaires moyens dans les *industries manufacturières* sont passés de \$169.72 en décembre à \$175.63 en janvier. Cette augmentation traduisait des progressions généralisées du nombre d'heures travaillées et des gains horaires, tant dans les biens durables que dans les biens non durables. Par rapport au mois précédent, le nombre hebdomadaire moyen d'heures a augmenté de 3.7% pour atteindre 39.4 et les gains horaires moyens ont progressé de 0.7% pour atteindre \$4.07.

Dans la *construction*, les gains hebdomadaires moyens ont grimpé de 13.5% pour atteindre \$232.75. Cette augmentation était considérablement plus faible que d'habitude pour cette époque de l'année, comme l'avait été la diminution des gains le mois précédent. Ces variations plus faibles que d'habitude reflétaient en partie le changement de régime saisonnier de la période des Fêtes. Le nombre moyen d'heures hebdomadaires a monté de 33.8 en décembre à 37.9 en janvier; les gains horaires moyens ont progressé de \$5.86 en décembre à \$6.13 en janvier.

Average weekly earnings in *transportation, communication and other utilities* showed little change over-the-month as increases in utilities were balanced by declines in communication. In *trade*, average weekly earnings rose 1.1 per cent in January to \$130.39. This increase reflected widespread gains in wholesale and substantially reduced employment in department stores, where earnings are lower than the industry average.

In *finance, insurance and real estate*, a 1.0 per cent rise in average weekly earnings reflected widespread increases in financial institutions and insurance carriers. In *service*, average weekly earnings jumped 3.2 per cent in January to \$120.26, this increase mainly reflected gains in miscellaneous services, hotels, restaurants and taverns, and engineering and scientific services.

1973 in Review

Employment

The twelve-month average of 1973 data, compared with the same period for 1972, showed a 4.1 per cent advance in the industrial composite employment index for Canada; this compares with gains of 2.1 per cent and 0.6 per cent in the two preceding years. The largest increases were in forestry (11.5 per cent), trade (5.7 per cent) and service (5.6 per cent); a 1.7 per cent decline was recorded in construction. All provinces showed higher levels of employment, the increases ranged from 1.7 per cent in Manitoba to 5.3 per cent in British Columbia.

Earnings

The average of twelve-months data for 1973, compared with the same period for 1972, showed a 7.3 per cent rise in average weekly earnings at the Canada composite level. The industry increases ranged from 6.7 per cent in transportation, communication and other utilities to 14.0 per cent in forestry; the provincial increases ranged from 6.8 per cent in Saskatchewan to 11.3 per cent in Newfoundland.

Les gains hebdomadaires moyens dans *les transports, les communications et les autres services publics* ont peu varié au cours du mois, les augmentations dans les services publics étant compensées par des diminutions dans les communications. Dans le *commerce*, les gains hebdomadaires moyens ont progressé de 1.1% en janvier pour atteindre \$130.39. Cette augmentation traduisait des progressions généralisées dans le commerce de gros et une réduction considérable de l'emploi dans les grands magasins, où les gains sont plus faibles que la moyenne dans cette activité économique.

Dans les *finances, les assurances et les affaires immobilières*, la hausse de 1.0% des gains hebdomadaires moyens traduisait des accroissements généralisés dans les institutions financières et les assureurs. Dans les *services*, les gains hebdomadaires moyens ont fait un bond de 3.2% en janvier pour atteindre \$120.26; cette augmentation traduisait surtout des progressions dans les services divers, les hôtels, les restaurants et tavernes, et les bureaux d'études et services scientifiques.

1973 en revue

Emploi

La moyenne des douze mois des données de 1973, comparée avec celle de la même période de 1972, fait ressortir une progression de 4.1% de l'indice synthétique de l'emploi dans les activités économiques pour le Canada; cela se compare avec des progressions de 2.1% et de 0.6% au cours des deux années précédentes. Les augmentations les plus considérables ont eu lieu dans les forêts (11.5%), le commerce (5.7%) et les services (5.6%); une diminution de 1.7% est survenue dans la construction. Toutes les provinces ont connu un accroissement du niveau de l'emploi, accroissement se situant entre 1.7% au Manitoba et 5.3% en Colombie-Britannique.

Gains

La moyenne des données des douze mois de 1973, comparée avec celle de la même période de 1972, fait ressortir une progression de 7.3% des gains hebdomadaires moyens au niveau de l'ensemble du Canada. Les augmentations oscillaient entre 6.7% pour les transports, les communications et les autres services publics et 14.0% pour les forêts; les augmentations provinciales se situaient entre 6.8% pour la Saskatchewan et 11.3% pour Terre-Neuve.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty(20) or more employees in any month of the year.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés durant n'importe quel mois de l'année.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. p Preliminary figures. - Nombres provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Notes: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. - Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. This table relates to average weekly earnings of all employees. - Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.
p Preliminary figures. - Nombres provisoires.
f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue No. 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue No. 72-002, February 1972.*

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002 for 1971, 1972 and 1973.*

- (1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du no 72-002 au catalogue pour les années 1971, 1972 et 1973.

- (1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qui

liminary(p); the latter are based on monthly averages.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised figures and annual averages; these data are contained in catalogue nos 72-201 and 72-202.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 — **Emploi, gains et durée du travail**, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 — **Estimations du revenu du travail**, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 — **Estimations du nombre d'employés par province et par industrie**, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

72-201 — **Review of Employment and Average Weekly Wages and Salaries**, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-202 — **Review of Man-Hours and Hourly Earnings**, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-204 — **Earnings and Hours of Work in Manufacturing, 1969**, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 — **Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971**, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

72-502 — **Labour Income, 1926-1958** — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-506 — **Côuts de la main-d'oeuvre dans l'industrie manufacturière, 1967**, Annuel

72-508 — **Estimations du nombre d'employés par province et industrie, 1961-1968**, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 — **Côuts de la main-d'oeuvre dans l'industrie manufacturière, 1968**, Annuel

72-511 — **Côuts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969**

72-513 — **Estimations du nombre d'employés par province et par industrie, 1961-1972**, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

72-601 — **Gains et heures de travail au Canada: Commerce de détail, Septembre 1970**

72-610 — **Côuts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970**

72-611 — **Côuts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970**

72-612 — **Côuts de la main-d'oeuvre au Canada: industrie manufacturière, 1971**

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés traitement et des employés à salaire indiqués séparément, signifient que données relatives aux employés pour lesquels les heures sont enregistrées sont pas disponibles.

First Estimates — March 1974

Seasonally-adjusted, the first estimate (1) of the Canada industrial composite (2) index of employment (1961 = 100) showed no change from February to March 1974. Gains in forestry, mining, transportation, communication and other utilities, trade and service were offset by declines in the remaining industry divisions. Quebec, Ontario and the Prairie Region recorded increases while the Atlantic Region and British Columbia showed reduced levels of employment.

Average weekly earnings, unadjusted for seasonal variations rose 1.1 per cent at the Canada composite level in March. This increase reflected gains in all industry divisions. All provinces contributed to the overall rise in the level of average earnings.

Employment — Seasonally-Adjusted

February 1974

Preliminary data for February 1974 showed a slight decline in the *Canada* industrial composite index of employment. For the most part, this decline was reflection of the reduction in employment in manufacturing. Industrial disputes and layoffs in machinery except electrical, transportation equipment and electrical products were the major factors underlying the 0.4 per cent decrease in manufacturing from January to February.

A 0.4 per cent decrease in finance, insurance and real estate mainly reflected declines in insurance and real estate. The 0.8 per cent drop in forestry was mainly in logging. Employment in transportation, communication and other utilities rose 0.3 per cent in February reflecting widespread gains in transportation. The 1.1 per cent increase in mining employment reflected gains in metals and the resolution of industrial disputes in mineral fuels. The 0.2 per cent increase in service was primarily in miscellaneous and recreational services; the gain in trade reflected slight increases in both retail and wholesale. In construction, gains in the building component were offset by declines in the engineering component.

In the *Atlantic Region*, the composite index of employment rose 0.8 per cent in February reflecting gains in all provinces except Newfoundland. The most substantial increases were in transportation, food and beverages and paper and allied industries. The latter gain reflected the settlement of industrial disputes.

The *Quebec* industrial composite index decreased by 0.2 per cent from January to February. Reduced employment in logging, non-durables manufacturing, engineering construction and business and personal services more than offset the considerable gains achieved in transportation.

Premières estimations — Mars 1974

La première estimation (1), désaisonnalisée, de l'indice synthétique (2) de l'emploi dans les activités économiques du Canada (1961 = 100) ne fait état d'aucun changement entre février et mars 1974. Des augmentations dans le forestage, les mines, les transports, communications et autres services d'utilité publique, dans le commerce et les services ont été neutralisées par des baisses dans les autres activités économiques. Le Québec, l'Ontario et la région des Prairies ont enregistré des hausses alors que l'emploi a diminué dans la région de l'Atlantique et en Colombie-Britannique.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.1% en mars au niveau de l'ensemble du Canada. Cette augmentation traduit des accroissements dans toutes les divisions d'activité économique. Toutes les provinces ont contribué à l'augmentation générale du niveau des gains moyens.

Emploi — Chiffres désaisonnalisés

Février 1974

Les données provisoires de février 1974 indiquent une légère baisse de l'indice synthétique de l'emploi dans les activités économiques pour l'ensemble du Canada. Dans la plupart des cas, cette baisse traduit une réduction de l'emploi dans les industries manufacturières. Les conflits du travail et les grèves dans l'industrie de la machinerie (sauf le matériel électrique), l'industrie du matériel de transport et l'industrie des appareils et du matériel électrique ont été les principaux facteurs à l'origine de la réduction de 0.4% dans les industries manufacturières de janvier à février.

Une baisse de 0.4% dans les finances, les assurances et l'immobilier traduit surtout des réductions dans les assurances et l'immobilier. La baisse de 0.8% dans le forestage se situe principalement au niveau de l'abattage. L'emploi dans la branche des transports, communications et autres services d'utilité publique a augmenté de 0.3% en février, reflétant d'importants gains dans le secteur du transport. L'augmentation de 1.1% de l'emploi dans les mines correspond à des augmentations dans l'industrie métallique et à la solution des conflits du travail dans le secteur des combustibles minéraux. L'augmentation de 0.2% dans les services se situait principalement dans les services divers et récréatifs; la hausse dans le commerce traduit de légères augmentations au niveau du commerce de détail et du commerce de gros. Dans la construction, les augmentations dans le bâtiment ont été neutralisées par des baisses dans les travaux publics.

Dans la *région de l'Atlantique*, l'indice synthétique de l'emploi a augmenté de 0.8% en février, traduisant des gains dans toutes les provinces à l'exception de Terre-Neuve. Les augmentations les plus importantes sont survenues dans les transports, les industries des aliments et boissons, et celles du papier et produits connexes. Cette dernière augmentation correspond au règlement des conflits du travail.

L'indice synthétique du *Québec* a baissé de 0.2% entre janvier et février. La réduction de l'emploi dans l'abattage, les industries manufacturières de biens non durables, les travaux publics et les services commerciaux, industriels et personnels a plus que neutralisé l'augmentation considérable survenue dans les transports.

In *Ontario*, the industrial composite employment index fell 0.5 per cent in February. This decline largely reflected the 0.9 per cent reduction in manufacturing employment, which, for the most part, was the result of industrial disputes in the durables component. Other decreases were recorded in transportation, retail trade and financial institutions; these were somewhat offset by widespread increases in service.

The industrial composite index of employment for the *Prairie Region* showed a 0.5 per cent rise in February reflecting gains in Manitoba and Alberta. The most substantial increases, on an industry basis, were in transportation, retail trade and personal services.

In *British Columbia*, the industrial composite index dropped 0.6 per cent from January to February. Gains in mineral fuels and transportation were more than offset by declines in non-durables manufacturing, building construction and retail trade.

Earnings and Hours

February 1974

Seasonally-adjusted, average weekly earnings at the Canada industrial composite level rose 0.5 per cent from January to February 1974. Gains were recorded in all industry divisions except mining, construction and transportation, communication and other utilities. All five regions recorded increases in earnings.

Unadjusted for seasonal variations, average weekly earnings rose 0.8 per cent in February to \$168.75 at the Canada composite level. All provinces contributed to this overall rise.

Average weekly earnings in *forestry* rose 5.7 per cent in February to \$216.41 mainly reflecting increased hours worked in Quebec and British Columbia.

In *mining*, average weekly earnings rose 0.7 per cent to \$226.97. For the most part, this gain reflected increased hours worked in services incidental to mining. Average weekly hours of hourly-rated wage-earners declined from 41.3 in January to 41.1 in February, while average hourly earnings rose 6 cents to \$5.15.

Average weekly earnings in *manufacturing* increased from \$175.75 in January to \$176.84 in February. Widespread gains were reported in both the durables and non-durables components. Average weekly hours declined slightly to 39.4, while average hourly earnings rose to \$4.10.

In *construction*, average weekly earnings increased by 1.2 per cent in February with gains being recorded in both building and engineering. Average weekly hours rose from 38.3 to 38.9 while average hourly earnings showed little change.

Average weekly earnings in *transportation, communication and other utilities* fell 0.4 per cent in February to \$191.79 as decreases in transportation offset gains in communication and utilities. In *trade*, average weekly earnings rose to \$132.04 in February reflecting gains in the retail trade component, especially food stores and department stores.

En *Ontario*, l'indice synthétique de l'emploi dans les activités économiques a baissé de 0.5% en février. Ce déclin reflétait en grande partie la réduction de 0.9% de l'emploi dans les industries manufacturières, qui, dans la plupart des cas, était due aux conflits du travail dans la composante des biens durables. Des baisses ont également été enregistrées dans le secteur des transports, du commerce de détail et des institutions financières; elles ont été quelque peu compensées par les augmentations considérables dans les services.

L'indice synthétique de l'emploi dans la *région des Prairies* a augmenté de 0.5% en février, reflétant des augmentations au Manitoba et en Alberta. Les augmentations les plus importantes par secteur économique ont eu lieu dans les transports, le commerce de détail et les services personnels.

En *Colombie-Britannique*, l'indice synthétique a diminué de 0.6% entre janvier et février. Des augmentations dans les combustibles minéraux et les transports ont été plus que neutralisées par les réductions dans l'industrie manufacturière de biens non durables, la construction de bâtiments et le commerce de détail.

Gains et heures de travail

Février 1974

Les gains hebdomadaires moyens désaisonnalisés au niveau de l'ensemble des activités économiques pour le Canada ont augmenté de 0.5% entre janvier et février 1974. Des augmentations ont été enregistrées dans toutes les branches d'activité à l'exception des mines, de la construction et des transports, des communications et autres services d'utilité publique. Des augmentations de gains ont été enregistrées dans les cinq régions.

Les gains hebdomadaires moyens non désaisonnalisés ont monté de 0.8% en février pour atteindre \$168.75 au niveau de l'ensemble du Canada. Toutes les provinces ont contribué à cette augmentation générale.

Les gains hebdomadaires moyens dans les *forêts* ont augmenté de 5.7% en février pour atteindre \$216.41, par suite surtout de l'augmentation du nombre d'heures travaillées au Québec et en Colombie-Britannique.

Dans les *mines*, les gains hebdomadaires moyens ont monté de 0.7% pour atteindre \$226.97. Pour la plupart, cette augmentation traduisait un accroissement du nombre d'heures travaillées dans les services miniers. Le nombre moyen d'heures hebdomadaires des ouvriers payés à l'heure a baissé, passant de 41.3 en janvier à 41.1 en février, tandis que les gains horaires moyens ont monté de 6 cents pour atteindre \$5.15.

Les gains hebdomadaires moyens dans les *industries manufacturières* sont passés de \$175.75 en janvier à \$176.84 en février. D'importantes augmentations ont été enregistrées tant dans la composante des biens durables que dans les biens non durables. Le nombre hebdomadaire moyen d'heures a légèrement baissé (39.4), et les gains horaires moyens ont augmenté pour atteindre \$4.10.

Dans le secteur de la *construction*, les gains hebdomadaires moyens ont augmenté de 1.2% en février et des augmentations ont été enregistrées tant dans le bâtiment que dans les travaux publics. Le nombre moyen d'heures hebdomadaires a monté de 38.3 à 38.9 tandis que les gains horaires moyens n'ont guère changé.

Les gains hebdomadaires moyens dans les *transports, les communications et les autres services d'utilité publique* ont baissé de 0.4% en février pour atteindre \$191.79, la baisse dans les transports ayant neutralisé des augmentations dans les communications et les services publics. Dans le *commerce*, les gains hebdomadaires moyens ont progressé pour atteindre \$132.04 en février. Cette augmentation traduit des gains dans le commerce de détail, notamment dans les magasins d'alimentation et les grands magasins.

In *finance, insurance and real estate*, increases in both financial institutions and insurance and real estate occasioned a 1.1 per cent overall rise to \$166.04. Average weekly earnings in *service* rose 0.8 per cent in February mainly reflecting gains in miscellaneous services.

Dans les *finances, les assurances et l'immobilier*, des augmentations tant dans les institutions financières que dans les assurances et l'immobilier sont à l'origine d'un accroissement généralisé de 1.1% (\$166.04). Les gains hebdomadaires moyens dans le secteur des *services* ont augmenté de 0.8% en février; cette augmentation traduit surtout des augmentations dans le secteur des services divers.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication

(2) Industrial composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt(20) employés durant n'importe quel mois de l'année.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

p Preliminary figures. - Nombres provisoires.

f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue No. 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue No. 72-002, February 1972.*

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne Gains hebdomadaires moyens des employés à salaire (heures déclarées) 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du n^o 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

CONCEPTS ET MÉTHODES

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en fils et tissus (2011) et en fils de filaments et fibres discontinues (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 — December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qui

inary(p); the latter are based on monthly averages.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

istical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only monthly aggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding most current data and third estimates for the month prior to that. One of these latter estimates are of higher quality than that of the first use of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and annual tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised monthly and annual averages; these data are contained in catalogue nos 72-201 and 72-202.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)
of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s) in month)

Wage-earners 001	Salaried employees 002	Total females 003

3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that
constitute salaries and wages for income tax purposes (see directions) \$

4. PAYROLL DETAIL

A. Data for the
last pay period(s)
in month only

WAGE-EARNERS (Non supervisory production, operational, maintenance, security, housekeeping,
warehousing, transport, food service and similar staffs: include retail sales clerks)

SALARIED EMPLOYEES
(executive, administra-
tive, professional &
technical, supervisory,
office, clerical
& related staffs)

Number of operating days
plus paid holidays and
days closed for
vacations (see directions)
(nearest day)

Wage-earners for whom hours
data are available
(include overtime hours worked)

Wage-earners for whom
hours data are not
available

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 — Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 — Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 — Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-202 — Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 — Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

72-502 — Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-506 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel

72-508 — Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel

72-511 — Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969

72-513 — Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

72-601 — Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

72-610 — Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970

72-611 — Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970

72-612 — Coûts de la main-d'oeuvre au Canada: industrie manufacturière, 1971

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1947 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figures.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates — April 1974

Seasonally-adjusted, the first estimate(1) of the Canada industrial composite(2) index of employment (1961=100) showed a 0.4 per cent rise from March to April 1974. Gains were recorded in all industry divisions except mining, construction and service, which declined. All provinces shared in the growth in employment except Nova Scotia, New Brunswick and Saskatchewan, which declined.

Average weekly earnings, unadjusted for seasonal variations, rose 0.9 per cent in April to \$172.39 at the Canada composite level. All industry divisions except forestry and all provinces except Newfoundland and contributed to the overall rise in the level of earnings.

Employment — Seasonally-Adjusted

March 1974

Preliminary data for March 1974 showed no change in the Canada industrial composite index of employment from the previous month. Employment in trade dropped 0.6 per cent as gains in wholesale were more than offset by declines in food stores, department stores and variety stores. Transportation, communication and other utilities rose 0.6 per cent in March mainly reflecting increases in highway and bridge maintenance and communication. In manufacturing, the index of employment rose 0.2 per cent mainly reflecting substantial increases in fish products and the resolution of industrial disputes in electrical industrial equipment.

The 1.1 per cent rise in mining employment was largely in the metals component, while the 0.3 per cent increase in construction was mainly in engineering. Forestry rose 1.1 per cent as the result of increases in logging. Finance, insurance and real estate rose 0.1 per cent reflecting gains in financial institutions and service gained 0.1 per cent as the result of advances in business and personal services.

In the *Atlantic Region*, the composite index of employment rose 0.3 per cent in March. Increases were recorded in Nova Scotia and New Brunswick; Newfoundland and Prince-Edward Island declined. The most substantial gains over-the-month were in water transport and services, highway and bridge maintenance, building and engineering; the largest declines were in fish products and logging.

The *Quebec* industrial composite index of employment showed no change from February to March. In manufacturing, there was little change in either durables or non-durables, while in transportation, communication and other utilities gains in highway and bridge maintenance offset declines in railway transport and water transport and services. In other areas, gains in logging, wholesale trade and financial institutions were balanced by declines in department stores, variety stores and miscellaneous services.

In *Ontario*, the composite index of employment rose 0.2 per cent in March. Manufacturing employment increased by 0.4 per cent as gains in electrical products, following the resolution of industrial disputes, were larger than the declines in motor vehicles. In addition,

Premières estimations — Avril 1974

La première estimation(1), désaisonnalisée, de l'indice synthétique industriel(2) de l'emploi dans les activités économiques du Canada (1961=100) fait état d'une augmentation de 0.4% entre mars et avril 1974. Des augmentations ont été enregistrées dans toutes les divisions d'activité économique à l'exception des mines, de la construction et des services, où l'emploi a régressé. Toutes les provinces ont contribué à cette augmentation à l'exception de la Nouvelle-Écosse, du Nouveau-Brunswick et de la Saskatchewan, qui ont vu l'emploi diminuer.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 0.9% en avril pour atteindre \$172.39 au niveau de l'ensemble du Canada. Toutes les divisions d'activité économique à l'exception du forage et toutes les provinces à l'exception de Terre-Neuve ont contribué à cette augmentation générale du niveau des gains.

Emploi — Chiffres désaisonnalisés

Mars 1974

Les données provisoires de mars 1974 ne font état d'aucun changement de l'indice synthétique industriel de l'emploi dans les activités économiques du Canada depuis le mois précédent. L'emploi dans le commerce a baissé de 0.6%: les augmentations dans le commerce de gros ont été plus que neutralisées par les baisses observées dans les magasins d'alimentation, les magasins à rayons et les bazars. Les transports, communications et autres services d'utilité publique ont progressé de 0.6% en mars, ce qui traduit surtout une hausse dans l'entretien des routes et ponts et dans les communications. Dans les industries manufacturières, l'indice de l'emploi a marqué une hausse de 0.2% par suite surtout d'augmentations sensibles dans l'industrie du poisson et du règlement de conflits du travail dans l'industrie du matériel électrique industriel.

La hausse de 1.1% de l'emploi dans les mines se concentrait dans une grande mesure dans les mines métalliques, alors que la hausse de 0.3% dans la construction se situait dans le secteur des travaux de génie civil. L'emploi dans le forage a augmenté de 1.1% par suite d'augmentations dans l'abattage. L'emploi dans la branche des finances, assurances et immeuble s'est élevé de 0.1%, traduisant des augmentations dans les établissements financiers, et la branche des services a progressé de 0.1% par suite d'augmentations dans les services extérieurs des entreprises et personnels.

Dans la *région de l'Atlantique*, l'indice synthétique industriel de l'emploi a augmenté de 0.3% en mars, traduisant des gains en Nouvelle-Écosse et au Nouveau-Brunswick, alors que Terre-Neuve et l'Île-du-Prince-Édouard enregistraient des baisses. Les augmentations les plus importantes sont survenues dans les transports par eau et services auxiliaires, l'entretien des routes et ponts, le bâtiment et les travaux de génie civil; les baisses les plus sensibles ont été enregistrées dans l'industrie du poisson et l'abattage du bois.

L'indice synthétique industriel de l'emploi au *Québec* n'a pas varié entre février et mars. Dans les industries manufacturières, on n'a guère enregistré de changement ni dans les biens durables ni dans les biens non durables, alors que dans les transports, communications et autres services d'utilité publique, des augmentations dans l'entretien des routes et des ponts ont été neutralisées par des baisses dans le transport ferroviaire et les transports par eau et services auxiliaires. Dans les autres secteurs, des augmentations dans l'abattage du bois, le commerce de gros, et les établissements financiers ont été neutralisées par des baisses dans les magasins à rayons, les bazars et les services divers.

En *Ontario*, l'indice synthétique industriel de l'emploi a progressé de 0.2% en mars. L'emploi dans les industries manufacturières a augmenté de 0.4% du fait que les augmentations dans l'industrie des appareils et du matériel électrique, à la suite du règlement de conflits du travail, ont été plus

increases were recorded in logging, metals mining, engineering, water transport and services, communication, wholesale trade and business services. Somewhat offsetting declines occurred in food stores, department stores and variety stores.

The industrial composite index of employment for the *Prairie Region* rose 0.3 per cent in March. Gains were recorded in Saskatchewan and Alberta while Manitoba posted a slight decline. On an industry basis, the largest increases were in metals mining, durables manufacturing, truck transport and communication; the largest declines were in building construction and business services.

In *British Columbia*, the industrial composite index of employment gained 0.8 per cent in March. For the most part, this increase reflected gains in fish products, durables manufacturing, business and personal services. Gains in retail trade were offset by declines in truck transport and highway and bridge maintenance.

Earnings and Hours

March 1974

Seasonally-adjusted, average weekly earnings at the Canada composite level rose 1.0 per cent from February to March. Gains were recorded in all industry divisions and in all provinces,

Unadjusted for seasonal variations, average weekly earnings rose 1.3 per cent in March to \$170.80 at the Canada composite level. Gains were recorded in all provinces except Prince Edward Island, which declined.

Average weekly earnings in *forestry* rose 1.8 per cent in March mainly reflecting increased hourly earnings in British Columbia.

In *mining*, average weekly earnings rose 1.1 per cent in March to \$229.00 mainly reflecting gains in metals and services incidental to mining. Average weekly hours of hourly-rated wage-earners decreased from 41.1 to 40.7 mainly reflecting decreases in metals. Average hourly earnings rose 11 cents to \$5.25 as the result mainly of gains in metals and services incidental to mining. Average weekly earnings in *manufacturing* rose 1.3 per cent in March to \$178.68 as increases were recorded in both durables and non-durables. Average weekly hours remained unchanged over-the-month, while average hourly earnings rose 6 cents to \$4.15.

In *construction*, average weekly earnings rose from \$236.42 in February to \$239.35 mainly reflecting increases in the building component. Average weekly hours increased from 38.5 to 38.7. Average hourly earnings advanced 6 cents to \$6.21.

Average weekly earnings in *transportation, communication and other utilities* rose 0.4 per cent in March reflecting gains in transportation and utilities. In *trade*, average weekly earnings rose 1.6 per cent to \$133.68 as increases were recorded in both wholesale and retail.

importantes que les baisses dans l'industrie automobile. Des gains ont également été enregistrés dans l'abattage du bois, les mines métalliques, les travaux de génie civil, les transports par eau et services auxiliaires, les communications, le commerce de gros et les services extérieurs des entreprises. Ces hausses ont été quelque peu neutralisées par des baisses dans les magasins d'alimentation, les magasins à rayons et les bazars.

L'indice synthétique industriel de l'emploi dans la *région des Prairies* a augmenté de 0.3% en mars; des augmentations ont été observées en Saskatchewan et en Alberta alors que le Manitoba enregistrerait une légère baisse. Par activité économique, les augmentations les plus importantes ont eu lieu dans les mines métalliques, les industries de fabrication de biens durables, les transports par camion et les communications; les baisses les plus sensibles ont été enregistrées dans le bâtiment et les services extérieurs des entreprises.

En *Colombie-Britannique*, l'indice synthétique industriel de l'emploi a progressé de 0.8% en mars, traduisant surtout des augmentations dans l'industrie du poisson, les industries de fabrication de biens durables et les services extérieurs des entreprises et personnels. Des gains dans le commerce de détail ont été neutralisés par des baisses dans le transport par camion et l'entretien des routes et ponts.

Gains et heures de travail

Mars 1974

Les gains hebdomadaires moyens désaisonnalisés au niveau de l'ensemble des activités économiques du Canada ont augmenté de 1.0% entre février et mars. Des augmentations ont été enregistrées dans toutes les divisions d'activité et dans toutes les provinces.

Les gains hebdomadaires moyens non désaisonnalisés ont monté de 1.3% en mars pour atteindre \$170.80 au niveau de l'ensemble du Canada. Des gains ont été observés dans toutes les provinces à l'exception de l'Île-du-Prince-Édouard, où il y a eu baisse.

Les gains hebdomadaires moyens dans le *forestage* ont augmenté de 1.8% en mars en grande partie par suite du relèvement des gains horaires en Colombie-Britannique.

Dans les *mines*, les gains hebdomadaires moyens ont progressé de 1.1% en mars pour atteindre \$229.00, surtout à cause d'augmentation dans les groupes des mines métalliques et des services miniers. Le nombre moyen d'heures hebdomadaires travaillées par les ouvriers payés à l'heure a baissé, passant de 41.1 à 40.7, par suite surtout de diminutions dans le groupe des mines métalliques. Les gains horaires moyens ont monté de 11 cents pour atteindre \$5.25, traduisant surtout des augmentations dans le groupe des mines métalliques et les services miniers. Les gains hebdomadaires moyens dans les industries *manufacturières* ont augmenté de 1.3% en mars pour atteindre \$178.68. Des augmentations ont été enregistrées tant dans la composante des biens durables que dans celle des biens non durables. Le nombre moyen d'heures hebdomadaires n'a pas varié au cours du mois, tandis que les gains horaires moyens ont augmenté de 6 cents pour atteindre \$4.15.

Dans la *construction*, les gains hebdomadaires moyens sont passés de \$236.42 en février à \$239.35, reflétant surtout des augmentations dans les bâtiment. Le nombre moyen d'heures hebdomadaires travaillées est passé de 38.5 à 38.7 et les gains horaires moyens ont augmenté de 6 cents pour atteindre \$6.21.

Les gains hebdomadaires moyens dans les *transports, les communications et les autres services d'utilité publique* ont augmenté de 0.4% en mars par suite d'augmentation dans les transports et les services d'utilité publique. Dans le *commerce*, les gains hebdomadaires moyens ont progressé de 1.6% pour atteindre \$133.68, traduisant des augmentations dans le commerce de gros et le commerce de détail.

Average weekly earnings in *finance, insurance and real estate* rose 2.1 per cent in March mainly as the result of gains in financial institutions. In *service*, average weekly earnings rose 1.1 per cent to \$120.33 reflecting gains in business, personal and miscellaneous services.

Dans les *finances, assurances et immeuble*, les gains hebdomadaires moyens ont progressé de 2.1% en mars, par suite surtout des augmentations observées dans les établissements financiers. Dans les *services*, les gains hebdomadaires moyens ont augmenté de 1.1% pour atteindre \$120.33, traduisant des hausses dans les services extérieurs des entreprises, personnels et divers.

Year-to-Date

Valeurs cumulées

Employment

Emploi

The average of the first three months of 1974, compared with the same period a year earlier, showed a 6.4 per cent rise in employment at the Canada industrial composite. The largest increases were in service (10.5 per cent) and construction (8.6 per cent); the smallest was in mining (3.0 per cent). All provinces showed higher levels of employment over-the-year ranging from 5.2 per cent in Quebec to 9.6 per cent in Prince Edward Island and Nova Scotia.

La moyenne des trois premiers mois de 1974 pour l'ensemble des industries canadiennes a progressé de 6.4% par rapport à la période correspondante de l'année précédente. Les augmentations les plus sensibles ont été enregistrées dans les services (10.5%) et la construction (8.6%); l'augmentation la plus faible a été celle des mines (3.0%). Toutes les provinces ont enregistré des hausses du niveau d'emploi par rapport à l'année précédente, hausse allant de 5.2% au Québec à 9.6% dans l'Île-du-Prince-Édouard et en Nouvelle-Écosse.

Earnings

Gains

The average of first-quarter data for 1974, compared with the same period for 1973, showed an 8.1 per cent rise in average weekly earnings at the Canada composite level. The industry division increases ranged from 5.8 per cent in construction to 11.4 per cent in transportation, communication and other utilities; the provincial increases ranged from 6.7 per cent in Ontario to 12.0 per cent in Newfoundland.

La moyenne du premier trimestre de 1974 pour l'ensemble des industries a progressé de 8.1% par rapport à la période correspondante de 1973 pour ce qui est des gains hebdomadaires moyens. Au niveau des divisions d'activité, les augmentations se sont échelonnées entre 5.8% dans la construction et 11.4% dans les transports, communications et autres services d'utilité publique; au niveau des provinces, les augmentations ont varié entre 6.7% en Ontario et 12.0% à Terre-Neuve.

- (1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.
- (2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

- (1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.
- (2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours de n'importe quel mois de l'année.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. p Preliminary figures. - Nombres provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1) (based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man-Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, *Catalogue No. 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue No. 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue No. 72-002, February 1972*.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1) (fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^o 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue No. 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002* for 1971, 1972 and 1973.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du n^o 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en fils et tissus (2011) et en fils de filaments et fibres discontinues (2012).

Employ

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qui

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

Industry - Industrie	Canada	Nfld. T.N.	P.E.I. I.du- P.-E.	N.S. N.-E.	N.B. N.B.	Qué.	Ont.	Man.	Sask.	Alta. - Alb.	B.C. - C.-B.

These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.

Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)
of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s) in month) Wage-earners 001 Salaried employees 002 Total females 003

3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that
constitute salaries and wages for income tax purposes (see directions) \$ 004 (omit cents)

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 — **Emploi, gains et durée du travail**, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 — **Estimations du revenu du travail**, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 — **Estimations du nombre d'employés par province et par industrie**, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

72-201 — **Review of Employment and Average Weekly Wages and Salaries**, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-202 — **Review of Man-Hours and Hourly Earnings**, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-204 — **Earnings and Hours of Work in Manufacturing, 1969**, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 — **Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971**, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

72-502 — **Labour Income, 1926-1958** — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-506 — **Côuts de la main-d'oeuvre dans l'industrie manufacturière, 1967**, Annuel

72-508 — **Estimations du nombre d'employés par province et industrie, 1961-1968**, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 — **Côuts de la main-d'oeuvre dans l'industrie manufacturière, 1968**, Annuel

72-511 — **Côuts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969**

72-513 — **Estimations du nombre d'employés par province et par industrie, 1961-1972**, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

72-601 — **Gains et heures de travail au Canada: Commerce de détail, Septembre 1970**

72-610 — **Côuts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970**

72-611 — **Côuts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970**

72-612 — **Côuts de la main-d'oeuvre au Canada: industrie manufacturière, 1971**

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

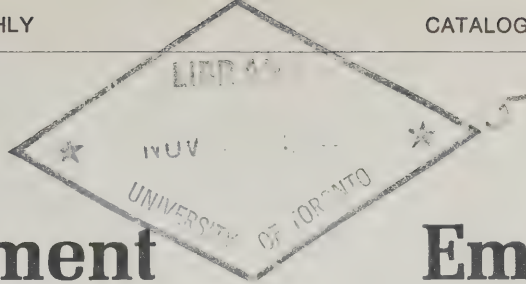

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- — amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates — May 1974

Seasonally-adjusted, the first estimate(1) of the Canada industrial composite(2) index of employment (1961=100) rose 0.1% in May. Gains were recorded in all industry divisions except forestry and trade, which declined. Quebec, Ontario and British Columbia recorded higher levels of employment over-the-month, while the Atlantic and Prairie Regions Showed declines.

Unadjusted for seasonal variation, average weekly earnings rose 2.2% at the Canada composite level in May. Increased earnings were recorded in all industry divisions except forestry and in all provinces.

Employment — Seasonally-adjusted

April 1974

Preliminary data for April 1974 showed a rise of 0.3% in the *Canada* industrial composite index of employment from the previous month. Employment in manufacturing rose 0.2% reflecting wide-spread gains in many industries including textile products, clothing, paper and allied industries, machinery except electrical, transportation equipment and electrical products. Increased employment in communication and utilities accounted for the largest portion of the 0.3% rise in transportation, communication and other utilities.

In trade, extensive gains in department stores, automotive product stores and apparel and shoe stores caused most of the 0.3% rise in employment. The 0.7% advance in finance, insurance and real estate was mainly in financial institutions. Increased employment in the logging sector was the main factor underlying the 2.6% rise in forestry, while the 0.1% increase in mining mainly reflected gains in metals. Construction decreased by 1.1% with declines in both building and engineering. Service dropped 0.5% mainly reflecting losses in business and miscellaneous services.

In the *Atlantic Region*, the composite index of employment fell 0.2% in April. Decreases in New Brunswick more than offset gains in the three remaining provinces. Industrial disputes in metals occasioned an 8.0% drop in mining employment. Declines were also recorded in food and beverage, wood products, building and engineering. Somewhat offsetting gains occurred in logging, forestry services, transportation equipment, transportation and retail trade.

The composite index of employment for *Quebec* showed a 0.5% rise from March to April. The most substantial gains were recorded in durable goods, non-durable goods, retail trade, financial institutions and business services. The fall in forestry employment was mainly in logging.

In *Ontario*, the industrial composite employment index decreased by 0.1% in April. Reduced employment was recorded in wholesale trade, business services and miscellaneous services. Employment increased in logging, metals mining, communication and financial institutions.

The industrial composite employment index rose 1.1% in the *Prairie Region* in April; Manitoba and Alberta posted increases,

Premières estimations — Mai 1974

La première estimation(1), désaisonnalisée, de l'indice synthétique industriel(2) de l'emploi dans les activités économiques du Canada (1961=100) fait état d'une augmentation de 0.1% en mai. Des augmentations ont été enregistrées dans toutes les divisions de l'activité économique à l'exception du forestage et du commerce qui ont accusé une baisse. Le Québec, l'Ontario et la Colombie-Britannique ont enregistré des hausses, alors que les régions de l'Atlantique et des Prairies accusaient des baisses.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 2.2% en mai au niveau de l'ensemble du Canada. Cette augmentation a été enregistrée dans toutes les divisions de l'activité économique sauf dans le forestage ainsi que dans toutes les provinces.

Emploi — Chiffres désaisonnalisés

Avril 1974

Les données provisoires d'avril 1974 indiquent une hausse de 0.3% de l'indice synthétique industriel de l'emploi dans les activités économiques du Canada depuis le mois précédent. L'emploi dans les industries manufacturières a progressé de 0.2%, reflétant d'importants gains dans de nombreuses industries, dont les produits textiles, le vêtement, le papier et les produits connexes, la machinerie (sauf le matériel électrique), le matériel de transport et les appareils et le matériel électrique. La hausse de l'emploi dans les communications et les services d'utilité publique a été le principal facteur de l'augmentation de 0.3% observée dans les transports, communications et autres services d'utilité publique.

Une augmentation de 0.3% de l'emploi dans le commerce traduit surtout des hausses dans les magasins à rayons, le commerce de détail de l'automobile, les magasins d'habillement et de chaussures. La hausse de 0.7% dans les finances, assurances et l'immeuble se situait surtout au niveau des établissements financiers. La hausse de l'emploi dans le secteur de l'abattage du bois a été le principal facteur à l'origine de l'augmentation de 2.6% dans le forestage, tandis que la hausse de 0.1% dans les mines reflétait des augmentations surtout dans les mines métalliques. Les baisses dans le bâtiment et génie civil se sont traduites par une diminution de 1.1% dans la construction. L'emploi dans les services a baissé de 0.5% par suite surtout de réductions dans les services extérieurs des entreprises et les services divers.

Dans la *région de l'Atlantique*, l'indice synthétique industriel de l'emploi a diminué de 0.2% en avril. Les réductions au Nouveau-Brunswick ont plus que neutralisé les gains des trois autres provinces. Des conflits du travail dans les mines métalliques ont causé une réduction de 8.0% de l'emploi dans les mines. On a aussi enregistré des baisses dans l'industrie des aliments et boissons, dans les produits du bois, le bâtiment et le génie civil. Ces réductions ont été quelque peu compensées par des augmentations dans l'abattage du bois, les services forestiers, le matériel de transport, les transports et le commerce de détail.

L'indice synthétique industriel de l'emploi du *Québec* a augmenté de 0.5% entre mars et avril. Les augmentations les plus sensibles ont été enregistrées dans les biens durables, les biens non durables, le commerce de détail, les établissements financiers et les services extérieurs des entreprises. La réduction de l'emploi dans le forestage se situait surtout au niveau de l'abattage du bois.

En *Ontario*, l'indice synthétique industriel de l'emploi dans les activités économiques a baissé de 0.1% en avril. La réduction de l'emploi est survenue dans le commerce de gros, les services extérieurs des entreprises et les services divers. L'emploi a augmenté dans l'abattage du bois, dans les mines métalliques, les communications et les établissements financiers.

L'indice synthétique industriel de l'emploi dans la *région des Prairies* a augmenté de 1.1% en avril; on note des augmentations au

Saskatchewan showed a decline. Employment gains were recorded in mineral fuels, durables manufacturing, non-durables manufacturing, department stores and personal services. The decline in construction mainly reflected industrial disputes in building in Saskatchewan.

In *British Columbia*, the composite index showed no change from March to April. Increased employment was recorded in logging, retail trade and financial institutions. The gains were offset by declines in fish products and personal services.

Earnings and Hours

April 1974

Seasonally-adjusted, average weekly earnings at the Canada composite level rose 0.6% in April. Gains were recorded in all industry divisions except forestry and construction and in all provinces except New Brunswick.

Unadjusted for seasonal variations, average weekly earnings rose 1.0% to \$172.37 at the Canada composite level. All provinces except Newfoundland contributed to the overall advance in the level of earnings.

In *forestry*, average weekly earnings fell 1.7% in April to \$218.70 mainly as the result of reduced hours worked in the Atlantic Region, Quebec and Ontario.

Average weekly earnings in *mining* rose 0.7% to \$230.95 as increases in metals and mineral fuels more than offset reductions in services incidental to mining. Average weekly hours of hourly-rated wage-earners decreased from 40.7 to 40.2 mainly reflecting decreases in services incidental to mining. Average hourly earnings gained 6 cents to \$5.32 mainly reflecting advances in metals and mineral fuels.

In *manufacturing*, average weekly earnings rose 0.7% in April to \$179.87 mainly reflecting increased earnings in the durable goods component. Average weekly hours fell to 39.1 from 39.5 mainly as the result of decreases in non-durables, while average hourly earnings rose from \$4.15 to \$4.20 with gains in both components.

Average weekly earnings in *construction* rose from \$239.22 in March to \$240.77 in April. Increases in building more than offset declines in engineering. Average weekly hours fell from 38.8 to 38.3 mainly reflecting decreases in engineering, while average hourly earnings jumped 8 cents to \$6.27 due to gains in building.

In *transportation, communication and other utilities* increased earnings in transportation and utilities more than offset losses in communication due to industrial disputes in post office; average weekly earnings rose 0.7% to \$196.62. The 1.9% increase in average weekly earnings in *trade* reflected widespread gains in both wholesale and retail.

Manitoba et en Alberta, tandis que la Saskatchewan accuse une baisse. Des augmentations de l'emploi sont signalées dans les combustibles minéraux, les industries de fabrication de biens durables et de biens non durables, les magasins à rayons et les services personnels. La réduction dans la construction reflète en grande partie les conflits du travail dans le bâtiment en Saskatchewan.

En *Colombie-Britannique*, l'indice synthétique industriel de l'emploi n'a pas changé entre mars et avril. Il y a eu des augmentations de l'emploi dans l'abattage du bois, le commerce de détail et les établissements financiers. Ces augmentations ont été neutralisées par des réductions dans l'industrie du poisson et les services personnels.

Gains et heures de travail

Avril 1974

Les gains hebdomadaires moyens désaisonnalisés au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.6% en avril. Des augmentations ont été enregistrées dans toutes les divisions de l'activité économique, sauf dans le *forestage* et la construction, et dans toutes les provinces à l'exception du Nouveau-Brunswick.

Les gains hebdomadaires moyens non désaisonnalisés ont monté de 1.0% pour atteindre \$172.37 au niveau de l'ensemble du Canada. Toutes les provinces ont contribué à l'augmentation générale des gains à l'exception de Terre-Neuve.

Les gains hebdomadaires moyens dans le *forestage* ont baissé de 1.7% en avril pour s'établir à \$218.70, par suite surtout de la diminution du nombre d'heures travaillées dans la région de l'Atlantique, au Québec et en Ontario.

Dans les *mines*, les gains hebdomadaires moyens ont progressé de 0.7% pour atteindre \$230.95 puisque les augmentations dans les mines métalliques et dans les combustibles minéraux ont plus que compensé les réductions dans les services miniers. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a baissé, passant de 40.7 à 40.2, par suite surtout des réductions dans les services miniers. Les gains horaires moyens ont monté de 6 cents pour atteindre \$5.32, par suite surtout des augmentations dans les mines métalliques et dans les combustibles minéraux.

Les gains hebdomadaires moyens dans les *industries manufacturières* ont augmenté de 0.7% en avril pour atteindre \$179.87, par suite surtout des augmentations des gains dans la composante des biens durables. Le nombre moyen d'heures hebdomadaires travaillées a baissé, passant de 39.5 à 39.1, en raison en grande partie des réductions dans les biens non durables, tandis que les gains horaires moyens ont augmenté, passant de \$4.15 à \$4.20 par suite des augmentations dans les deux composantes.

Dans le secteur de la *construction*, les gains hebdomadaires moyens sont passés de \$239.22 en mars à \$240.77 en avril. Des augmentations dans le bâtiment ont plus que compensé les réductions dans les travaux de génie civil. Le nombre moyen d'heures hebdomadaires a baissé, passant de 38.8 à 38.3, par suite surtout des réductions dans les travaux de génie civil, tandis que les gains horaires moyens ont monté de 8 cents pour atteindre \$6.27 en raison des augmentations dans le bâtiment.

Dans les *transports, communications et autres services d'utilité publique*, l'augmentation des gains dans les transports et les services d'utilité publique a plus que compensé les réductions dans les communications, lesquelles étaient attribuables aux conflits du travail dans le service des postes; les gains hebdomadaires moyens ont monté de 0.7% pour atteindre \$196.62. L'augmentation de 1.9% des gains hebdomadaires moyens dans le *commerce* reflète d'importantes hausses tant dans le commerce de gros que dans le commerce de détail.

In *finance, insurance and real estate*, average weekly earning rose 1.1% to \$171.52 as gains in financial institutions more than offset decreases in insurance and real estate. Average weekly earnings in *service* rose from \$119.74 in March to \$122.46 in April as gains were recorded in all four component industries.

Dans les *finances, assurances et immeuble*, les gains hebdomadaires moyens ont progressé de 1.1% pour atteindre \$171.52 les augmentations dans les établissements financiers ayant plus que compensé les diminutions dans les assurances et l'immeuble. Les gains hebdomadaires moyens dans les *services* sont passés de \$119.74 en mars à \$122.46 en avril par suite d'augmentations qui ont été enregistrées dans les quatre industries composantes.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours de n'importe quel mois de l'année.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

p Preliminary figures. - Nombres provisoires.
f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue No. 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue No. 72-002, February 1972.*

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002 for 1971, 1972 and 1973.*

- (1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du no 72-002 au catalogue pour les années 1971, 1972 et 1973.

- (1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Emploi

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are in paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular* and *part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les employés réguliers à temps partiel sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes de rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés par le nombre d'heures par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qu

preliminary(p); the latter are based on monthly averages.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised figures and annual averages; these data are contained in catalogue nos 72-201 and 72-202.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont exceptionnellement petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(3) These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 — Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 — Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 — Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-202 — Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 — Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

72-502 — Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-506 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel

72-508 — Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel

72-511 — Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969

72-513 — Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

72-601 — Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

72-610 — Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970

72-611 — Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970

72-612 — Coûts de la main-d'oeuvre au Canada: industrie manufacturière, 1971

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

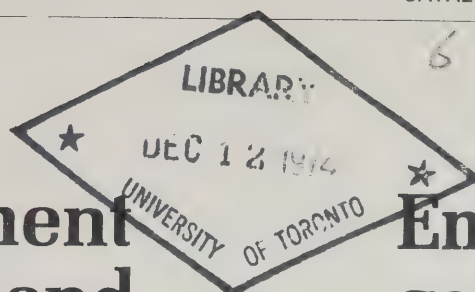

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indication contraire) les colonnes laissées en blanc dans le cas des employés à traitement et des employés à salaire indiqués séparément, signifient que les données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

First Estimates — June 1974

Seasonally-adjusted, the first estimate(1) of the *Canada* industrial composite(2) index of employment (1961=100) rose 0.3% in June. Gains in mining, manufacturing, trade, finance, insurance and real estate and service outweighed declines in the remaining industry divisions. Employment increased in Ontario, remained unchanged in Quebec and declined in the remaining regions.

Unadjusted for seasonal variations, average weekly earnings rose 1.2% in June at the Canada composite level. Increased earnings were recorded in all industry divisions except forestry and in all five regions.

Employment — Seasonally-Adjusted

May 1974

Preliminary data for May 1974 showed a decline of 0.1% in the Canada industrial composite index of employment. Decreases in employment were recorded in forestry, construction, manufacturing and mining; the remaining industry divisions showed gains.

Employment in forestry fell 10.2% reflecting reduced activity in the logging sector in all regions except British Columbia. The 1.3% decrease in construction employment reflected industrial disputes in British Columbia. Employment in manufacturing decreased by 0.1% as losses in non-durables outweighed gains in durables. Mining showed a 0.3% decline from April to May mainly reflecting decreases in services incidental to mining.

The 1.3% rise in employment in transportation, communication and other utilities reflected gains in all components. Service advanced by 1.0% as increases were recorded in recreational, business and miscellaneous services. The 0.4% rise in employment in trade was in both wholesale and retail. Employment in finance, insurance and real estate rose 0.8% reflecting gains in both financial institutions and insurance and real estate.

In the *Atlantic Region*, the composite index fell 0.6% in May. Reduced employment in Newfoundland, Prince Edward Island and Nova Scotia outweighed gains in New Brunswick. The most substantial decreases were in logging, electric power, gas and water, wholesale trade and retail trade.

The composite index of employment for *Quebec* showed a 0.1% rise from April to May. Gains were recorded in metals mining, engineering construction, communication, retail trade, wholesale trade and financial institutions. Somewhat offsetting declines occurred in logging and non-durables manufacturing.

In *Ontario*, the industrial composite index of employment rose 0.4% in May. Widespread gains in durables manufacturing accounted for the largest portion of this gain. In addition, increased employment

Premières estimations — Juin 1974

La première estimation(1), désaisonnalisée, de l'indice synthétique industriel(2) de l'emploi dans les activités économiques du Canada (1961=100) fait état d'une augmentation de 0.3% en juin. Des augmentations dans les mines, les industries manufacturières, le commerce, les finances, les assurances et l'immeuble et les services ont plus que compensé les baisses dans les autres divisions de l'activité économique. Le niveau d'emploi a augmenté en Ontario, il est resté inchangé au Québec et a diminué dans le reste des régions.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.2% au niveau de l'ensemble du Canada. Cette augmentation a été enregistrée dans toutes les divisions de l'activité économique sauf dans le forestage, ainsi que dans les cinq régions.

Emploi — Chiffres désaisonnalisés

Mai 1974

Les données provisoires de mai 1974 indiquent une baisse de 0.1% de l'indice synthétique industriel de l'emploi dans les activités économiques du Canada. Des baisses de l'emploi ont été enregistrées dans les forestage, la construction, les industries manufacturières et les mines; il y a eu augmentation dans les autres divisions de l'activité économique.

Le ralentissement de l'activité dans l'abattage du bois dans toutes les régions à l'exception de la Colombie-Britannique s'est traduit par une diminution de 10.2% de l'emploi dans le forestage. La diminution de 1.3% de l'emploi dans la construction reflète les conflits du travail en Colombie-Britannique. L'emploi a diminué de 0.1% dans les industries manufacturières, les baisses dans les biens non durables ayant plus que neutralisé les hausses dans les biens durables. Une baisse de 0.3% a été enregistrée entre avril et mai par suite surtout des réductions dans les services miniers.

L'augmentation de 1.3% de l'emploi dans les transports, communications et autres services d'utilité publique reflète des gains dans toutes les composantes. L'emploi dans les services a progressé de 1.0% par suite d'augmentations dans les services récréatifs, services extérieurs des entreprises et dans les services divers. L'augmentation de 0.4% de l'emploi dans le commerce, se situait tant dans le commerce de gros que dans le commerce de détail. L'emploi dans les finances, les assurances et l'immeuble a augmenté de 0.8% par suite de gains tant dans les établissements financiers que dans les assurances et l'immeuble.

Dans la *région de l'Atlantique*, l'indice synthétique industriel de l'emploi a diminué en mai de 0.6%. La diminution de l'emploi à Terre-Neuve, dans l'Île-du-Prince-Édouard et en Nouvelle-Écosse a plus que neutralisé l'augmentation enregistrée au Nouveau-Brunswick. Les baisses les plus sensibles ont été observées dans l'abattage du bois, l'électricité, gaz et eau, le commerce de gros et de détail.

L'indice synthétique industriel de l'emploi du *Québec* a augmenté de 0.1% entre avril et mai. Des augmentations ont été enregistrées dans les mines métalliques, les travaux de génie civil, les communications, le commerce de détail, le commerce de gros et les établissements financiers. Les baisses survenues dans l'abattage du bois et les industries de fabrication de biens non durables ont quelque peu neutralisé ces augmentations.

En *Ontario*, l'indice synthétique industriel de l'emploi a progressé en mai de 0.4%. Cette augmentation est attribuable, en grande partie, aux importantes hausses enregistrées dans les industries de fabrication de biens

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.

(2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice synthétique industriel s'applique à l'ensemble des activités économiques, sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours de n'importe quel mois de l'année.

was recorded in metals mining, wholesale trade, financial institutions and all elements of service. Declines in employment occurred in logging and in engineering construction.

The industrial composite employment index for the *Prairie Region* showed a 0.1% decrease from April to May as declines in Alberta and Saskatchewan offset gains in Manitoba. Employment decreased in logging, services incidental to mining and non-durables manufacturing. Partially offsetting gains occurred in highway and bridge maintenance, wholesale trade and retail trade.

In *British Columbia*, the composite index of employment fell 0.9% in May. Industrial disputes in construction occasioned a drop in employment of almost 25% from the previous month. This decline far outweighed the gains which were recorded in logging, water transport and services, financial institutions and personal services, among others.

Earnings and Hours

May 1974

Seasonally-adjusted, average weekly earnings rose 2.4% at the Canada composite level in May. Gains were recorded in all provinces and all industry divisions.

Unadjusted for seasonal variations, average weekly earnings rose 1.8% to \$175.26 at the Canada composite level. All provinces contributed to the overall advance except New Brunswick, which declined. All industry divisions increased except forestry.

In *forestry*, average weekly earnings fell from \$217.80 in April to \$216.45 in May mainly reflecting fewer hours worked in Quebec.

Average weekly earnings in *mining* rose 1.4% in May to \$232.96 as increases in metals and mineral fuels more than offset reductions in services incidental to mining. Average weekly hours of hourly-rated wage-earners rose from 40.2 in April to 40.4 in May, while average hourly earnings increased by 9 cents to \$5.37.

In *manufacturing*, average weekly earnings rose 1.2% to \$182.10. For the most part, this increase reflected widespread gains in the non-durables component. Average weekly hours decreased from 39.2 in April to 39.0 in May as declines in durables more than offset gains in non-durables. Average hourly earnings rose from \$4.21 to \$4.27 reflecting gains in both components.

Average weekly earnings in *construction* rose from \$240.62 in April to \$246.58 in May with increases being recorded in both building and engineering. Average weekly hours rose from 38.3 to 38.9 reflecting increases in the engineering component. Average hourly earnings increased 6 cents to \$6.35 as gains in building more than offset declines in engineering.

In *transportation, communication and other utilities*, the 2.3% advance in average weekly earnings mainly reflected substantial gains

durables. En outre, une augmentation de l'emploi a été enregistrée dans les mines métalliques, le commerce de gros, les établissements financiers et dans toutes les composantes des services. Des baisses de l'emploi sont survenues dans l'abattage du bois et dans les travaux de génie civil.

L'indice synthétique industriel de l'emploi dans la *région des Prairies* a baissé de 0.1% entre avril et mai, les baisses enregistrées en Alberta et en Saskatchewan ayant neutralisé les hausses observées au Manitoba. L'emploi a diminué dans l'abattage du bois, les services miniers et les industries de fabrication de biens non durables. Des hausses enregistrées dans l'entretien des routes et ponts, le commerce de gros et de détail ont en partie compensé ces baisses.

En *Colombie-Britannique*, l'indice synthétique industriel de l'emploi a diminué de 0.9% en mai. Des conflits du travail dans la construction ont provoqué une baisse de presque 25% de l'emploi par rapport au mois précédent. Cette baisse a de loin neutralisé les hausses qui avaient été enregistrées, entre autres, dans l'abattage du bois, le transport par eau et les auxiliaires, les établissements financiers et les services personnels.

Gains et heures de travail

Mai 1974

Les gains hebdomadaires moyens désaisonnalisés au niveau de l'ensemble des activités économiques du Canada ont augmenté de 2.4% en mai. Des augmentations ont été enregistrées dans toutes les provinces et dans toutes les divisions d'activité économique.

Les gains hebdomadaires moyens non désaisonnalisés ont progressé de 1.8% pour atteindre \$175.26 au niveau de l'ensemble des activités économiques du Canada. Toutes les provinces ont contribué à l'augmentation générale à l'exception du Nouveau-Brunswick qui a accusé une baisse. Il y a eu augmentation dans toutes les divisions de l'activité économique sauf dans le forestage.

Les gains hebdomadaires moyens dans le *forestage* ont baissé, passant de \$217.80 en avril à \$216.45 en mai, par suite surtout de la diminution du nombre d'heures travaillées au Québec.

Dans les *mines*, les gains hebdomadaires moyens ont augmenté de 1.4% en mai pour atteindre \$232.96, des hausses dans les mines métalliques et les combustibles minéraux ayant plus que compensé les réductions enregistrées dans les services miniers. Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a augmenté, passant de 40.2 en avril à 40.4 en mai, tandis que les gains horaires moyens ont augmenté de 9 cents pour atteindre \$5.37.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 1.2% pour atteindre \$182.10, par suite surtout des hausses importantes enregistrées dans la composante des biens non durables. Le nombre moyen d'heures hebdomadaires travaillées a baissé, passant de 39.2 en avril à 39.0 en mai, les réductions dans les biens durables ayant plus que neutralisé les augmentations dans les biens non durables. Les gains horaires moyens ont augmenté, passant de \$4.21 à \$4.27 par suite des augmentations dans les deux composantes.

Dans le secteur de la *construction*, les gains hebdomadaires moyens ont augmenté, passant de \$240.62 en avril à \$246.58 en mai en raison des augmentations enregistrées tant dans le bâtiment que dans les travaux de génie civil. Le nombre moyen d'heures hebdomadaires travaillées a augmenté, passant de 38.3 à 38.9, par suite des augmentations dans la composante des travaux de génie civil. Les gains horaires moyens ont augmenté de 6 cents pour atteindre \$6.35, les hausses dans le bâtiment ayant plus que compensé les baisses dans les travaux de génie civil.

Dans les *transports, communications et autres services d'utilité publique*, la hausse de 2.3% des gains hebdomadaires moyens reflétait

in post office following the short work week due to industrial disputes in the previous month. Average weekly earnings in *trade* rose 2.3% with gains in both wholesale and retail.

Average weekly earnings in *finance, insurance and real estate* rose 0.4% in May to \$172.26. In *service*, all components contributed to the 1.5% advance in average weekly earnings from April to May.

surtout d'importantes augmentations dans le service des postes où la semaine de travail avait diminué par suite de conflits du travail du mois précédent. Dans le *commerce*, l'augmentation de 2.3% des gains hebdomadaires moyens reflète des hausses tant dans le commerce de gros que dans le commerce de détail.

Dans les *finances, assurances et immeuble*, les gains hebdomadaires moyens ont progressé de 0.4% en mai pour atteindre \$172.26. Dans les *services*, toutes les composantes ont contribué à l'augmentation de 1.5% des gains hebdomadaires enregistrée entre avril et mai.

Notes: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. - Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région. p Preliminary figures. - Nombres provisoires. f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Notes: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. - Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue No. 62-002. - Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. This table relates to average weekly earnings of all employees. - Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

p Preliminary figures. - Nombres provisoires.

f First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

TABLE 11. Index Numbers (1961=100) of Average Hourly Earnings in Selected Industries, for Canada 1961-1973

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960:

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue No. 72-201, 1957-67*; Review of Man-Hours and Hourly Earnings, *Catalogue No. 72-202, 1957-67*

B. 1961-1970:

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction, highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue No. 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue No. 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue No. 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue No. 72-002, February 1972.*

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960:

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *no 72-201 au catalogue, 1957-1967* Review of Man-Hours and Hourly Earnings, *no 72-202 au catalogue, 1957-1967*

B. 1961-1970:

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours*, no 72-002 au catalogue, octobre 1971.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le no 72-002 au catalogue, février 1968.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *no 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^o 72-002 au catalogue, février 1972.

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners - 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue No. 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue No. 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue No. 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue Nos. 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue Nos. 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue Nos. 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue Nos. 72-201 and 72-202, 1968-1970.*

C. 1971-1973:

All series are published in the monthly issues of *Catalogue No. 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^o 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^o 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, no 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les nos 72-201 et 72-202, au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les nos 72-201 et 72-202, au catalogue 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les nos 72-201 et 72-202, au catalogue 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les nos 72-201 et 72-202 au catalogue 1968-1970.

C. 1971-1973:

Toutes les séries sont publiées dans les bulletins mensuels du no 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated to present the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue No. 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue No. 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of total employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (no 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (no 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le pourcentage de l'emploi

tion of larger to smaller establishments. This proportion varies considerably among industries. The table at the end of the notes shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue No. 72-008).

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue No. 12-501 (1960). The "SIC code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) — The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) — The sum of wood products (SIC 250-259), furniture and fixtures (SIC 260-269), primary metal industries (SIC 290-298), metal fabricating industries (SIC 300-309), machinery (except electrical) (SIC 310-318), transportation equipment (SIC 320-329), electrical products (SIC 330-339), and non-metallic mineral products (SIC 340-359).

total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau publié à la fin des présentes notes indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue).

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", no 12-501 au catalogue (1960). Les colonnes "code de la CTI" des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) — l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) — l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Non-durable goods manufacturing (non-dur) — The sum of food and beverages (SIC 100-147), tobacco processing and products (SIC 150-153), rubber products (SIC 160-169), leather products (SIC 170-179), textile products (SIC 180-229), knitting mills (SIC 230-239), clothing (SIC 240-249), paper and allied industries (SIC 270-274), printing, publishing and allied industries (SIC 280-289), petroleum and coal products (SIC 360-369), chemicals and chemical products (SIC 370-379), and miscellaneous manufacturing industries (SIC 380-399).

Building (404,421) — The sum of general contractors (SIC 404) and special trade contractors (SIC 421).

Engineering (406-409) — The sum of highway, bridge and street construction (SIC 406) and other construction (SIC 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes working owners or partners in unincorporated businesses, non-working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and

Manufactures, biens non durables (non dur.) — L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) — L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) — L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on peut connaître le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la

travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 -- December 1971" (Catalogue No. 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as

commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (no 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. A remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. A l'exception des statistiques provisoires (p), qui

preliminary(p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65 and 75%, respectively). Consequently full details for both months are shown within this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised figures and annual averages; these data are contained in catalogue nos 2-201 and 72-202.

sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1970 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1970(1)

Industrial Composite(3) - Ensemble des industries(3)	56.7	54.9	38.6	48.0	52.5	57.4	59.9	58.3	43.0	51.2	55.2

1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

2) These percentages are exceptionally small because non-commercial services, including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont exceptionnellement petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

3) These percentages are smaller than might be expected as both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits que l'on pourrait s'y attendre parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

☐ Grève ou lock-out

☐ Congés ou vacances
non rémunérés

PUBLICATIONS SUR L'EMPLOI ET LA REMUNERATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, après le concept de l'établissement:

2-002 — Emploi, gains et durée du travail, Mensuel

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

2-005 — Estimations du revenu du travail, Mensuel

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

2-008 — Estimations du nombre d'employés par province et par industrie, Mensuel

(Estimations du nombre total d'employés et comparaisons avec le mois précédent et l'année précédente).

2-201 — Review of Employment and Average Weekly Wages and Salaries, Annuel

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

2-202 — Review of Man-Hours and Hourly Earnings, Annuel

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région: chiffres mensuels et annuels pour une longue période; graphiques et notes explicatives).

2-204 — Earnings and Hours of Work in Manufacturing, 1969, Annuel

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, employés et ouvriers pour une semaine d'octobre à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

2-206 — Emploi, rémunérations et heures séries désaisonnalisées janvier 1961 à décembre 1971, Annuel

(Indices de l'emploi, rémunérations hebdomadaires moyennes, heures hebdomadaires moyennes et rémunérations, horaires moyennes: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés, moyennes mobiles MDC et tendances finales du cycle).

2-502 — Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

2-506 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1967, Annuel

2-508 — Estimations du nombre d'employés par province et industrie, 1961-1968, hors série

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

2-510 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Annuel

2-511 — Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1969

2-513 — Estimations du nombre d'employés par province et par industrie, 1961-1972, hors série

Ce bulletin renferme des données mensuelles pour les années 1961 à 1972 inclusivement en remplacement des données publiées auparavant dans le bulletin mensuel intitulé "Estimations du nombre d'employés par province et par industrie" (no 72-008 au catalogue) et le bulletin hors série (no 72-508 au catalogue). Il présente des données révisées de janvier 1961 à février 1971 inclusivement et de nouvelles données pour les mois suivants.

2-601 — Gains et heures de travail au Canada: Commerce de détail, Septembre 1970

2-610 — Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970

2-611 — Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970

2-612 — Coûts de la main-d'oeuvre au Canada: industrie manufacturière, 1971

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 — Employment, Earnings and Hours, Monthly

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 — Estimates of Labour Income, Monthly

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 — Estimates of Employees by Province and Industry, Monthly

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 — Review of Employment and Average Weekly Wages and Salaries, Annual

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 — Review of Man-Hours and Hourly Earnings, Annual

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Annual

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 — Employment, Earnings and Hours Seasonally-adjusted Series — January 1961 — December 1971, Annual

(Index numbers of employment, average weekly earnings, average weekly hours and average hourly earnings: unadjusted, final seasonal factors, seasonally-adjusted, MCD moving average and final trend cycle).

72-502 — Labour Income, 1926-58 — Out of print, Engl.

(A record of annual estimates of Labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-506 — Labour Costs in Manufacturing, Annual, 1967.

72-508 — Estimates of Employees by Province and Industry, 1961-1968, Occasional

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 — Labour Costs in Manufacturing, Annual, 1968.

72-511 — Labour Costs in Canada: Mines, Quarries and Oil Wells, 1969.

72-513 — Estimates of employees by province and industry, 1961-1972, Occasional

This publication contains monthly data for 1961 to 1972 inclusive which supersede data previously published in the monthly report "Estimates of Employees by Province and Industry" (Catalogue No. 72-008) and the occasional report (Catalogue No. 72-508). Included are revised data for the period January 1961 to February 1971 inclusive and new data for subsequent months.

72-601 — Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970

72-610 — Labour Costs in Canada: Finance, Insurance and Real Estate, 1970

72-611 — Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970

72-612 — Labour Costs in Canada: Manufacturing, 1971

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.
